- Optional attachment (photo/audio/video) for quick context

### Respond Faster with Smart Routing

- Role and department based distribution
- Email, SMS and in-app notifications
- Integration with top systems to leverage existing workflows

### Review & Analyze with Dashboards

- Real-time visibility of issues and resolution status
- Escalation of priority issues
- Reports to monitor trends and statistics

Trusted by World-Class Organizations

## Mobile-First Problem Reporting for Smart Workspaces

Report problems as they arise, respond with immediate action, and solve problems at their root cause. Create value progressively under a culture of continuous improvement with **See to Solve Alert™**.

Capture opportunities that deliver better business outcomes

Data-based insights drive high-velocity continuous improvement, root-cause analysis, and organizational learning.

- Improve processes by keeping your team on Alert™
- Increased uptime and productivity
- Capture immediate opportunities for improvement

## Benefits

- ✓ **Improve Employee Experience**  
One, easy to use interface makes reporting problems hassle-free and intuitive for staff.
- ✓ **Fix Problems Faster**  
Automated routing sends reported issues to the department or person who can address them, eliminating delays and guess-work. Designated “responders” learn about problems more quickly and get remedies in motion faster.
- ✓ **Stop Small Problems from Becoming Big Problems**  
Managers can see where attention is needed and escalate priority issues before bigger problems erupt.
- ✓ **Know Where You Stand**  
Real-time dashboards provide leaders immediate knowledge and visibility of issues, as well as peace of mind when things are quiet.
- ✓ **Improve Faster**  
Data-based insights help with root cause analysis, process improvement, uptime, productivity and organizational learning.
